

Safer Stores Start with Connected Teams.

Two-Way Radios

Body Worn Camera

Video Surveillance

Retail teams need to respond quickly, protect employees, and document incidents clearly. Radio One/CSE Crosscom helps retailers connect people, video, and communication tools so teams can act with confidence **when it matters most.**

Body-Worn Cameras

Help protect employees, document incidents, and support faster response.

Body-worn cameras give retail teams a clear way to capture what happened during safety, security, or customer incidents.

Record video evidence when incidents occur
Support de-escalation and employee accountability
Help managers review events with better information

**When every second matters,
your team should not have to respond alone.**

Two-Way Radios & Push-to-Talk

Instant communication across the store.

Reliable push-to-talk communication keeps associates, department leads, managers, and security teams connected throughout the day.

**Reach the right person quickly
Coordinate support during busy periods
Improve communication between departments**

Video Surveillance

See more. Know sooner. Respond faster.

AI-enabled video helps retailers monitor key areas, identify risks, and support investigations across the store.

Radio One | CSE Crosscom brings together the tools teams need to communicate clearly, respond quickly, and protect employees, customers, and inventory.
